TESOURO SECURITY

RESPONSIBLE BUSINESS

Modern Slavery Statement

Document status: Website publication template | Review cycle: Annual or following material change

1. Purpose

Tesouro Security is committed to conducting business responsibly and does not tolerate slavery, servitude, forced or compulsory labour, or human trafficking within its operations or supply relationships.

2. Our business

Tesouro Security provides private security activities, security systems services, non-financial management consultancy, and disinfecting and exterminating services. Our supply chain may include labour providers, subcontractors, equipment suppliers, technology providers and specialist service partners.

3. Risk-based due diligence

We seek to apply proportionate checks to suppliers and contractors, taking account of the nature of the service, labour intensity, geography, use of subcontracting and other relevant indicators. Where appropriate, we may request evidence relating to employment practices, right-to-work controls, policies and supply-chain standards.

4. Employment and labour standards

We expect workers engaged in our operations to be treated lawfully and with dignity. Recruitment fees charged to workers, retention of identity documents, coercion, threats, forced labour and deceptive recruitment practices are inconsistent with our standards.

5. Supplier expectations

Suppliers and subcontractors are expected to comply with applicable law and to take reasonable steps to prevent modern slavery in their own operations and supply chains. Material concerns may lead to further enquiries, corrective action, suspension or termination of a relationship, subject to contractual and legal considerations.

6. Raising concerns

Employees, contractors, suppliers and other stakeholders are encouraged to raise concerns in good faith. Concerns can be reported to management or by contacting enquiries@tesourosecurity.co.uk. Reports should be handled sensitively and escalated where appropriate.

7. Training and awareness

Relevant personnel should be made aware of indicators of exploitation and the importance of escalating concerns, particularly where roles involve recruitment, procurement, subcontracting or site supervision.

8. Review

This statement should be reviewed at least annually and updated where there are material changes to the business, supply chain or applicable legal requirements.
