TESOURO SECURITY

DATA PROTECTION AND PRIVACY

Privacy Policy

Document status: Website publication template | Review cycle: Annual or following material change

1. Overview

This Privacy Policy explains, at a general level, how Tesouro Security may handle personal information received through business enquiries, client and supplier relationships, recruitment or other legitimate business interactions.

2. Information we may receive

Depending on the interaction, information may include names, job titles, organisation details, telephone numbers, email addresses, correspondence, service requirements, contractual information and other information voluntarily provided to us.

3. Why information is used

Personal information may be used to respond to enquiries, provide and administer services, manage business relationships, maintain records, meet legal or regulatory obligations, protect legitimate business interests and handle complaints or disputes.

4. Website enquiry form

The current static website enquiry form opens the visitor's email application and prepares an email addressed to Tesouro Security. The static website itself does not operate a database that stores form submissions. The resulting email is handled through the sender's and recipient's email systems.

5. Lawful handling

Where UK data protection law applies, personal information should be handled on an appropriate lawful basis. The relevant basis will depend on the circumstances and may include contractual necessity, legal obligation, legitimate interests or consent where consent is specifically required.

6. Sharing information

Information may be shared with service providers, professional advisers, competent authorities or other parties where reasonably necessary and lawful. We do not state that personal information is sold to third parties.

7. Retention and security

Information should be retained only for as long as reasonably required for the relevant purpose, taking account of legal, contractual and operational requirements. Reasonable organisational and technical measures should be used to protect information.

8. Individual rights

Individuals may have rights under applicable data protection law, including rights relating to access, correction, deletion, restriction, objection and data portability, subject to legal conditions and exemptions.

9. Contact and complaints

Privacy enquiries can be sent to enquiries@tesourosecurity.co.uk. Individuals may also have the right to complain to the UK Information Commissioner's Office where UK data protection law applies.

10. Updates

This policy may be updated to reflect changes in our services, systems, legal obligations or business practices. The version published on our website should be treated as the current website version.
